(54) Title: SAILING CRAFT WITH WHEELS

(57) Abstract: A wound treatment dressing for applying negative pressure wound therapy to a wound of an extremity, such as on the heel of a foot. The dressing includes a fluid manifold (14) positioned within a fenestrated drape (16) to form a contoured occlusive wrapping (10) for placement over the wound. A contoured porous pad (26) is placed adjacent or within the wound, such that the contoured pad (26) is enveloped by the occlusive wrapping (10). Flexible tubing (42) is attached to or through a fluid communication port (18) which forms an opening through the outer layer (16b) of the occlusive wrapping (10) so as to allow for fluid communication of negative pressure to the contoured pad (26) from a source of negative pressure (44) connected to the opposite end of the flexible tubing (42) through fenestrations (19) of the occlusive wrapping (10), such that negative gauge pressure is applied to the wound on the extremity.
